Figure 1

PLAYING EQUIPMENT

- 72 wooden blocks
- 1 standard, six-sided die (Hey! How about using one of Belknap Hill Trading Post's™ Giant Yard Dice?! Visit BelknapHill.com and shop today!)

GAME SETUP

Build the starting tower on a flat, stable surface. Start by placing three timbers evenly alongside one another. Place another three timbers on top of those at a 90-degree angle, forming an even second level (Figure 1). Continue stacking timbers in sets of three, alternating the direction of each level, until all timbers have been stacked into a 24-story tower.

GAMEPLAY

Players roll a die to determine how many timbers they must remove. The number rolled is the number you pull!

Using *one* hand only, remove timbers from anywhere below the highest complete level by tapping them or sliding them out. Add timbers to the top level—still using just one hand!—and place them at a 90 degree angle to the timbers on the level below. Place no more than three timbers on each level, and complete each level before starting to build the next.

Players take turns until one player causes the tower to topple. The last player to stack a timber on top of the tower without knocking it over wins the game.

WARNING: Drilling, sawing, sanding, or machining wood products generates wood dust, a substance known to the State of California to cause cancer. Avoid inhaling dust generated from wood products or use a dust mask or other safeguards to avoid inhaling dust from wood products. Wood products emit chemicals known to the State of California to cause birth defects or other reproductive harm.
